

KATE GORDON

Front End Developer

I am a Front End Developer with a background in hospitality and film production. My problem solving and product oriented approach brings a unique perspective to my work. I value communication and creative solutions. While I continue to build on my coding skills specifically in React, CSS frameworks, and responsive design, I am pursuing a knowledge of UI design via friends in design jobs, online resources, working on some personal side projects, and continuing to use Figma.
